

## DRAFT SURVEY ON THE 2016 HIGH LEVEL MEETING DECLARATION

### [Text for email and Website]:

In June 2016 the High Level Meeting on HIV/AIDS will take place in New York, after which a Political Declaration will be adopted that will set the stage not only for the course that the HIV response will take in the coming years, but also the intensity, scope and prioritization of that course, in the framework of the Sustainable Development Goals that were approved in 2015 by the General Assembly.

This is one of the biggest opportunities for advocacy in the near future. The Political Declarations on HIV/AIDS are important (see the **2011 and 2006** Declarations), as they have historically set the groundwork for global programs that have made a difference in the HIV epidemic, like the 15x15 target (to get 15 million people on treatment by 2015), which was met. Pressure from civil society is key to include clear and bold targets on prevention, treatment, human rights and financing.

UNAIDS is carrying out a series of consultations in the next weeks, which begin with this e-Survey, to receive feedback from people on the themes that will be debated in the HLM.
